

Seaguard Wet Chemical and PFOS

PFOS AND SURFACTANT DECLARATION STATEMENT

Product: Seaguard Wet Chemical Fire Suppression Solution

Declaration Date: Jan 2025

FORMAL PRODUCT COMPOSITION DECLARATION

This declaration is issued by Seaguard Australia regarding the composition of Seaguard Wet Chemical fire suppression solution.

Product Identification: Seaguard Wet Chemical Solution

Primary Composition: Aqueous solution of potassium salts

Declarations Regarding Specific Substances

The Company hereby declares that:

1. **PFOS (Perfluorooctane Sulfonate):** The Product does not contain perfluorooctane sulfonate (PFOS) or any PFOS-related compounds as intentionally added ingredients in its formulation.
2. **PFOA (Perfluorooctanoic Acid):** The Product does not contain perfluorooctanoic acid (PFOA) or any PFOA-related compounds as intentionally added ingredients in its formulation.
3. **Surfactants:** The Product does not contain surfactants of any kind in its formulation.

Compositional Statement

Seaguard Wet Chemical is formulated as an aqueous solution consisting exclusively of a variety of potassium salts and water. The Product does not contain fluorinated compounds, surface-active agents, or other additives beyond its core potassium salt formulation.

Basis of Declaration

This declaration is based on:

- Raw material specifications provided by suppliers
- Product formulation records maintained by the Company
- Current knowledge of the Product's composition as of the date of this declaration

Limitations and Scope

This declaration pertains specifically to the intentional formulation of the Product and does not constitute a guarantee regarding trace contaminants that may be present at levels below standard analytical detection limits due to environmental background levels or manufacturing processes beyond the Company's control.

This declaration is provided for regulatory compliance and procurement purposes. For questions regarding this declaration, please contact Seaguard Australia Pty Ltd.
